About the m-station high performance football rebounder

Benefits:

More than just a rebounder:

- **m-station** is the largest, most powerful and most versatile rebounder in the world. It can create all kinds of passes and so it enables players to practise all technical elements of football repetitively.
- What creates a good rebounder is the rebound speed, surface size, quality and opportunity to angle the rebounder according to what is being trained.
- **Munin** have created the **m-station** rebounders to fulfil these needs— the first high quality and high-performance rebounders on the market.
- The **m-station** can be used for team practise as well as solo practise.
- Studies show that when players use **m-station** in training they become more responsible for their own technical development.
- Training is more effective and fun with the ball at the players feet.

10 different angle settings

- Ten different inclination settings on the **m-station** are easy to adjust. They determine the curve of the ball allowing **realistic** practise of different forms of first touch, passes, chest control, heading, etc.
- **m-station** is currently being used by players from the Premier League to children from 7 years old in amateur clubs.

Specifications:

- **m-station PRO** has the largest football rebound surface area on the market at 2.7metres x 2.7metres.
- Specially developed string generates a maximum rebound. Less than 5% loss of speed. Feeds the player with realistic passes.
- Suitable for all levels from grass roots to professional clubs for training, skills development, rehab, etc.
- **m-station PRO** prices from £1,875.00 plus shipping & VAT.

- **m-station TALENT** is now available with rebound surface area of 1.45metres X 1.45metres.
- Suitable for home use, schools, etc.
- Fun and inclusive sport and exercise routines.
- m-trainer iPhone app allows strike rate and other performance measures to be recorded, displayed, compared and shared, and measure progression etc.
- **m-station TALENT** prices from £435.00 plus shipping & VAT.

Munin Sports **m-station** football rebounder is a high-quality product, manufactured in Denmark and made with stainless steel and light-weight aluminium.
It has been tried and tested at all levels from young children to national coaching associations.
